

BE105

FREE STANDING SPIDER

Four 2" sockets with 2 x M12 bolts located on each socket and arranged to give three leg supports and one vertical. With three lengths of scaffolding poles inserted into the leg sockets and a longer scaffolding pole in the vertical socket the unit becomes free standing. For additional security an eye bolt located at the base can be secured to a ground stake to pull down the centre of the bracket.

Finish:- Galvanised
