

BE201 BASE TILT SUPPORT

The base tilt support is similar to the BE 203 but, is designed to hold a 2" or scaffolding size mast, to be used in conjunction with a suitable wall bracket to secure the mast in the upright position. Fixing will decide lowering line.

Designed by Barenco and manufactured using our standard tilt, hinge system incorporating a M12 bolt as a hinge pin.

Base size is 140mm x 75mm and has 2 x 13mm fixing holes 4.25" (108mm) on centre line.

The upper part with 2 M8 bolts to secure tube and help prevent rotation.

The new finish for this product is Sherardized.

Designed and Manufactured by BARENCO
