

BE215

DOUBLE HINGE SOCKET EXTENDED 2" TO EXTENDED 2"

The extended double socket is designed to hinge a 2" or Scaffold size mast some distance above the ground. BE 215 is similar to the BE205 & BE211 with it's hinge and double locking bolts, but with a over extension stop so the mast will not over balance before the second bolt is secured.

To tilt the pole always remove the bolt without internal washers fitted to the bolt.

The new finish for this product is Sherardized.
