

## **BE308 - Drilled TOP HAT ALUMINIUM INLINE OR CROSSOVER MOUNTING BRACKET**

Top hat style colinear or crossover mounting bracket in aluminium supplied as a drilled bracket to support the BE307 which has seen various ammounts of usable situations and with the demand for a heavy duty version we have the BE308 now available.

We will drill a blank aluminium bracket to suit up to 4.5" 'U' Bolts on the foot section and 3.5" 'U' Bolts in top hat raised section, or bolts you select from our range to suit your application. We will drill up to 20 holes to suit 'U' and 'V' bolts and saddles for them. No bolts, saddles or other hardware have been included in the above price.

With a footprint of 150mm wide and 230mm long and a standoff of 40mm and the 6mm thick aluminium gives a strong bracket and will handle poles up to 4.5" in diameter.

Suitable application is for mounting to top of lighting columns and street furnature, airport signage and to give a flat platform to a round section pole for mounting control gear etc.

Please note that when selecting your choice of bolts that 2 bolts of the same size are required for each pole, 2 poles = 4 bolts.
