

BE505

GROUND GUY STAKE 36"

36" Ground guy stake suitable for both driving into soil and for securing into concrete.

All sizes have a 12.5mm hole in the welded top plate.

In addition all ground guy stakes have a 30mm bar welded across the internal angle as shown in the photo at approximately one third of the way down the stake from the top.

This welded bar will act as an indicator to the total length when the ground stake is partly driven into the ground.

Angle Iron ground stakes available in 18", 27" and 36" overall lengths.

Finish : Sherardized
