

BE625

SITE CABIN BRACKET

A multi punched 6mm plate to secure a 2" pole to a square leg of a site cabin. Bracket supplied with one 4" square bottom bolt and two 2" V Bolts. With this design of plate it is possible to secure any 2" pole to a leg of a cabin from 60mm square to 100mm square or its imperial equivalent. Should a very long pole or yagi be installed it may require two complete brackets.

Spare Square Bottom Bolt - See BE948
