

BE630

**3" X 3" CROSSOVER OR INLINE MOUNTING PLATE 4MM
STEEL GALVANISED**

The BE630 connects two 3" masts at right angles or inline.

Made in our own workshop from 4mm plate steel, this product gives a very strong connection between masts, and can be used to build big antenna arrays or stacking and baying aerials and satellite dish mounting poles.

Plate size 125mm x 175mm x 4mm thick supplied complete with M8 bolts, 2 x 3" 'U' Bolts - BE959 and 2 x 3" 'V' Bolts - BE958.

With the 'V' bolts supplied these can reduce down to except 1.9" or scaffolding as the smallest tube size.

If your requirement is for all 'U' bolts or 'V' bolts please contact the sales office before ordering.

All bolts are sufficiently long enough to accomodate BE921 3" heavy duty saddles, these will have to be ordered as an additional item.

Plate Finish : Galvanized
