

# **BE631**

## **3" x 3" CROSSOVER OR INLINE MOUNTING PLATE 6mm STEEL GALVANISED**

The BE631 connects two 3" masts at right angles or inline.

Made in our own workshop from 6mm plate steel, this product gives a very strong connection between masts, and can be used to build big antenna arrays or stacking and baying aerials and satellite dish mounting poles.

Plate size 125mm x 175mm x 6mm thick supplied complete with M10 bolts, 2 x 3" 'U' Bolts - BE947 and 2 x 3" 'V' Bolts - BE946.

With the 'V' bolts supplied these can reduce down to except 1.9" or scaffolding as the smallest tube size.

If your requirement is for all 'U' bolts or 'V' bolts please contact the sales office before ordering.

All bolts are sufficiently long enough to accomodate BE921 3" heavy duty saddles, these will have to be ordered as an additional item.

This item is similar to BE630 but with heavier plate and the next thread size up on the bolts.

Plate Finish : Hot Dipped Galvanised.
