

BE640/6/U20U20

2" x 2" ALUMINIUM CROSSOVER - M6 BOLTS - 4"x4"x1/4" Plate

The BE640/6/U20U20 connects 2" masting to 2" masting at right angles.

Made in our own workshop from 4" x 1/4" aluminium flat strip, this product gives a very strong connection between masts, and can be used to build big antenna arrays or stacking and baying aerials.

Being made from 4" x 4" x 1/4" aluminium gives a light weight bracket.

If you require a special crossover plate size please contact the sales office 01949 860400 or use the contact form available.

All crossover plates are packed unassembled. i.e. flat pack for ease of shipping..

All 'U' bolts are complete with Flat Washers and Full Nuts, BZP Finish.

Replacement Bolts. Order Code : 2" 'U' Bolts BE951
