

BE705 CHIMNEY CRADLE 13.5"

This chimney bracket is of cradle type construction and requires a single lashing and will handle up to a 2" (50mm) aluminium mast.

Overall height of 13.5" and chimney to mast clearance 4".

The main area of use for the cradle is if a substantial fixing is required on a short chimney stack, or the angle of the tiles limits the area lashing wire can be placed.

Requires 2 x BE915 or BE915SS (2" V Bolts sold separately)

Finish: Galvanized
