## RATCHET GUY TENSIONER, BLACK PLASTIC

Light duty ratchet guy tensioner with a snap locking mechanism. Has a 4mm hole in centre to take rope. This can be drilled out to take larger rope, but will reduce the effectiveness of the Guy Tensioner. Now with a stainless steel tension spring to prevent ratchet release under low tension.

Simple to use and adjusted with a 3/8" square drive hole.

All held together with stainless steel bolt. Max load 100Kg
