

MP04100

MASTRANT P 4MM X 100M

Safe working load:- 120Kg

Breaking strength:- 400Kg

Elongation working:- 2.4 %

Weight:- 1.5 Kg/100 m

New type of guyrope optimized for both fixed and portable work with high performance/price rate.

It has low weight, good strength, low elongation, high UV and humidity resistance.

Construction:- Braided rope with twisted cores.

Core:- Polyester, parallel-arranged twisted cores.

Cover:- Polyester 12 or 16 (depending on diameter)

Barenco offer a guy assembly service if you require set guy lengths with swaged ferrules as per photograph, however we are unable to strength test after assembly.

See ADC04 for Duplex clip should you require to make you own guys.
